**Subject:** prep for Q4 PID mitigation meetings (quick turnaround needed)  
**Attachments:** 11-1-22 WORKING DRAFT Draft Internal - Baseline FIFRA Eco Mitigation Guidance (1).docx

Hi all,

In prep for the Q4 PID mitigation meetings tomorrow, would you all mind sending me a summary of the baseline mitigation measures from the attached guidance that would apply for your case based on the eco risk and benefit rankings from EFED and BEAD? If you haven't yet pulled together a summary, just take the guidance attached, go through it, and highlight the specific measures/labeling that you think would apply for your case. Doesn't need to be perfect. It shouldn't take you longer than half an hr to an hr.

James has already started working on a summary for norflurazon. Not sure if the other teams have already pulled something together.

I intend to add these summaries to the agenda for the meetings tomorrow. But quick turn-around needed on this, need by 2 pm today.

Thanks,

Khue Nguyen
